Psychological Factors

Psychological predispositions, such as anxiety disorders, social phobias, or post-traumatic stress disorder (PTSD), can make individuals more susceptible to developing a fear of men.

Environmental Factors

Growing up in environments where male figures were absent, abusive, or overly intimidating can shape one's attitude toward men. Conversely, overexposure to negative stereotypes about men can also foster mistrust and fear.

Manifestations of the Fear of Men

Addressing societal issues related to gender violence and inequality is vital in creating safer environments for everyone. Education campaigns, policy changes, and community engagement can foster respect and reduce violence.

The Role of Society and Community
