Subject: Biology Class ? Photosynthesis Lab

Reflection:

Today's lab on photosynthesis was both challenging and enlightening. We were asked to observe the rate of oxygen production in Elodea plants under different light conditions. At first, I was a bit overwhelmed by the scientific terminology and the experimental setup, but as I worked through the steps, I started to understand the process better.

Emotionally, I felt confident when I successfully completed the experiment, but I also experienced frustration when my initial results didn't match the expected outcomes. This made me realize how important precise measurements and attention to detail are in scientific work. I learned that light intensity significantly affects the rate of photosynthesis, which confirms what we studied in class.

This experience highlighted the importance of patience and careful observation. Moving forward, I plan to review the lab instructions more thoroughly before starting and ask questions if I'm unsure about any step. My goal is to improve my accuracy in experiments and deepen my understanding of biological processes. I hope to apply these skills in future science projects and develop a more methodical approach to learning.
